### ***A Client's Experience:***

“As my life changed, it was time to move into a retirement community. My husband passed away unexpectedly and I was still living in our family home. Not knowing where to start, I called Yours Mine and Our Design to help me with the letting go of what I didn't need and packing and moving me to my new community and home.

Christine's expertise and knowledge of design created my new and functional living space. Her help was invaluable in choosing the right sized furniture and art that would comfortably fit in my new home. I was so comfortable with everything. The communication was great throughout the whole process, everything was done on schedule and every detail handled and taken care of.

Walking into my new home, I am amazed at how beautiful everything is, perfectly arranged and organized. I am happy and love it here ... just couldn't have done it without the girls.”
